PROFESSIONAL SUMMARY

AI Engineer Final-year Computer Science (AI) student specializing in full-stack development with the MERN stack — React.js, Node.js, Express.js, and MongoDB. Experienced in building responsive UIs with Tailwind CSS and Bootstrap, implementing REST APIs, JWT authentication, and CRUD functionality across multiple full-stack projects. Comfortable working across the stack from database design (MySQL, MongoDB) to frontend interfaces, with solid Git/GitHub workflow experience. Seeking a Full Stack Developer role to build scalable web applications and grow within a product-driven engineering team.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript,

Frontend: HTML5, CSS3, React.js, Tailwind CSS, Bootstrap

Backend: Node.js, Express.js, REST APIs, JWT Authentication

Databases: MongoDB, MySQL

Tools & Platforms: Git, GitHub, VS Code, Postman, npm

PROFESSIONAL EXPERIENCE

AI Automation & Intelligent Solutions Intern — BharatCares (CSRBOX Group) *Remote · Jun 2026 – Jul 2026*

- Completed a 6-week AICTE-recognized program applying Agentic AI and Generative AI concepts through structured technical masterclasses
- Designed AI workflow structures and automation logic covering multi-step agent-based task execution and decision flows
- Applied Transformer architecture and Large Language Model (LLM) fundamentals to practical AI agent design exercises
- Implemented prompt engineering techniques to structure inputs and guide LLM-based agent behavior in project exercises
- Executed IBM SkillsBuild learning modules on AI agents, intelligent automation, and virtual assistant system design
- Contributed to AI project planning using Lean Canvas methodology, translating concepts into structured implementation plans.

Web Development Intern — Elevate Labs *Remote · Aug 2025 – Sep 2025*

- Built responsive web application interfaces using HTML, CSS, JavaScript, and React across multiple project modules
- Applied modern frontend development practices, including component structuring and responsive design patterns, to production-style code
- Debugged and optimized existing codebases to resolve functional issues and improve rendering performance
- Executed Git-based version control workflows, including branching and commits, to manage iterative code changes
- Contributed to end-to-end project development cycles, from implementation through testing and review.

HIGHLIGHTED AI & MERN PROJECTS

DietTracker – AI Assisted Nutrition & Fitness Tracking Platform *Mar 2026 – Apr 2026*

Tech – React.js, Node.js, Express.js, MongoDB, JWT, Chart.js, Tailwind CSS

- A full-stack MERN application that helps users track calorie intake, plan meals, and monitor fitness metrics through real-time data visualization.

SnapTrip – Full-Stack Travel & Accommodation Booking Platform *May 2025 – Jun 2025*

Tech Stack – React.js, Node.js, Express.js, MongoDB, Passport.js, Cloudinary, Mapbox, REST APIs

- An Airbnb-inspired booking platform enabling users to list, search, and book properties with real-time map integration and secure authentication.

ACADEMIC ACHIEVEMENTS

Full Stack Development Certification (MERN) & DSA in Java Certification – Apna College

GenAI Powered Data Analytics Job Simulation Certification – Forage

Chase & Co- Software Engineering Job Simulation Certification – Forage

EDUCATION

Bachelor of Technology (B.Tech), Computer Science & Engineering (AI) 2023 – 2027

Mandsaur University Mandsaur, Madhya Pradesh
